

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-3. (Cancelled)

4. (Currently Amended) ~~The device of claim 3, including~~ A device for use with a passenger conveyor, comprising:

a display that provides a visible indication of a direction of movement of the conveyor and a variable, visible indication of maintenance information regarding the conveyor, wherein the display includes a first display panel that provides at least the direction indication and a second display panel that provides at least some of the maintenance information; and

a support and wherein the display panels are supported for movement relative to the support between a first position where the first panel is visible and a second position where the second panel is visible.

5. (Previously Presented) The device of claim 4, wherein the display panels are on opposite sides of a plate portion and the plate portion is pivotally moveable relative to the support.

6. (Previously Presented) The device of claim 5, including a recess on the support and wherein the plate portion is at least partially received in the recess in the first position.

7. (Currently Amended) The device of claim 6, wherein the support is adapted to be placed between a handrail and a landing near an end of the conveyor and the recess is on a surface of the support that is at least partially at an oblique angle relative to the landing.

8. (Currently Amended) ~~The device of claim 3, including~~ A device for use with a passenger conveyor, comprising:

~~a display that provides a visible indication of a direction of movement of the conveyor and a variable, visible indication of maintenance information regarding the conveyor wherein the display includes a first display panel that provides at least the direction indication and a second display panel that provides at least some of the maintenance information; and~~

~~at least one switch supported near the second display panel, the switch being actuatable to selectively view available maintenance information.~~

9-16. (Cancelled)

17. (Currently Amended) ~~The passenger conveyor of claim 16, including~~ A passenger conveyor, comprising:

~~a plurality of steps that are moveable along a selected path between two landings;~~

~~a machine that selectively moves the steps; and~~

~~a display near one end of the conveyor that provides a visible indication of a direction of movement of the conveyor and a variable, visible indication of maintenance information regarding the conveyor, wherein the display includes a first display panel that provides at least the direction indication and a second display panel that provides at least some of the maintenance information;~~

~~a support; and~~

~~a plate portion that is moveably supported by the support and wherein the display panels are on opposite sides of the plate portion.~~

18. (Previously Presented) The passenger conveyor of claim 17, including a recess on the support and wherein the plate portion is at least partially received in the recess when the first panel is visible.

19. (Previously Presented) The passenger conveyor of claim 18, wherein the recess is on a surface of the support that is at least partially at an oblique angle relative to one of the landings.

20-30. (Cancelled)
